

2025-26 Casino Probity Program

The 2025-26 Casino Probity Program aimed to assess Casino Canberra's governance, operational controls and probity framework with a focus on integrity and risks associated with money laundering and compliance practices.

What we did?

The Casino Probity Program was undertaken as an assessment of probity, integrity and governance within Casino Canberra. The program was designed to evaluate the effectiveness of operational controls and supporting frameworks within the scope of the regulator's role. A combination of desktop reviews and onsite inspection activities were undertaken to assess the Casino Canberra's current framework.

What we found?

The Program did not identify any non-compliance. The GRC and Casino Canberra will continue to engage collaboratively to ensure operations and governance meet legal obligations and keep pace with current industry trends and legislative changes.
